Count Me

| Problem | Submissions | Leaderboard | Discussions |

Problem Statement

You will be given a string **S** which will contain Lowercase, Uppercase English alphabets and spaces. You need to tell which word occurs the most times and also the count of that word.

Note: If there are multiple word which occurs the most, print the first word which became the maximum count before others.

Input Format

- First line will contain **T**, the number of test cases.

- Each test case will contain the string **S**.

Constraints

1. 1 <= **T** <= 1000

2. 1 <= **|S|** <= 10^4, Here |S| means the length of S.

Output Format

- Output the word and the count that occurs the most.

Sample Input 0

```
1
Ratul loves to play football when he gets time but Ratul is not a good player so his teacher asked Ratul if he
can play with him so that Ratul can progress
```

Sample Output 0

```
Ratul 4
```

Sample Input 1

```
2
ratul piyush fohad shuvo rafi piyush fohad ratul
jony jony yes papa eating sugar no papa telling lies no papa open your mouth ha ha ha
```

Sample Output 1

```
piyush 2
papa 3
```
